XI. HR

I. Introduction

1 - What is Odoo

Odoo is a comprehensive open-source enterprise resource planning (ERP) software made up of an integrated suite of business modules

2 - Odoo Modules

- CRM
- Sales
- e-Commerce
- Accounting
- Inventory
- Manufacturing
- Employees

3 - Odoo ERP Implementation methodology:

1. Install basic Odoo.
2. Set up the load balancing if you need
3. Set up the database.
4. Install Odoo applications.
5. Install customized apps if any.
6. Configure the basic master like company info, user details, etc..
7. Configure user wise access levels.
8. And use.

II. General Settings

1 - Users

[Settings/User](<https://www.odoo.com/documentation/userIntroduction>

General Settings CRM Sales Odoo Studio Planning Timesheets

Approvals Appointments Accounting

2 - Companies

- Edit current company
- Manage company

Company Name

General Information

Website	e.g. https://www.odoo.com

Figure 1: Settings/Company/New

3 - Groups

- Groups defines rules to models within an application

The screenshot shows the Odoo Settings Groups page. At the top, there is a navigation bar with icons for General Settings, a star icon, a blue circle with '2', a green circle with '2', a lock icon, 'YourCompany', and a user profile for 'Mitchell Admin (aht-training)'. Below the navigation bar, the page title is 'Groups' with a 'CREATE' button. A search bar contains 'Internal Groups' and a magnifying glass icon. There are filters for 'Filters', 'Group By', and 'Favorites', and a page indicator '1-38 / 38'.

The main content area displays a list of groups:

- Invoicing / Billing
- Invoicing / Billing Administrator
- Extra Rights / Contact Creation
- Technical Settings / Discount on lines
- Website / Editor and Designer
- User types / Internal User

A tooltip for 'Technical Settings / Discount on lines' is visible. Below this list, there is a detailed view for the 'Internal User' group:

Application	User types	Name	Internal User			
Share Group	<input type="checkbox"/>					
Users	Inherited	Menus	Views	Access Rights	Record Rules	Notes
Name	Login			Language	Latest authentication	Company
Mitchell Admin	maiptn8399@gmail.com				09/23/2020 17:48:01	YourCompany

Products

Weight Measurement

Choose the unit to measure weight

- Kilogram
- Pound

Volume unit of measure

In which unit of measure do you manage your volumes

- Cubic Meters
- Cubic Feet

Multi-Company

Inter-Company Transactions

Automatically generate counterpart documents for orders/invoices between companies

Odoo Cloud Notification (OCN)

Push Notifications

Get notifications on Android and iOS application

III - CRM

1 - CRM settings

- Leads designates an individual who might become your customer, but currently isn't. Leads are usually converted to contacts, companies and deals (opportunities) or are 'junked'.

CRM

Leads
Add a qualification step before the creation of an opportunity

Predictive Lead Scoring
Let statistical analysis determine the probability to close a lead

Fields used in probability computation:
 State Country Phone Quality Email Quality
 Source

Consider leads created as of the 09/02/2020

Lead Generation

Visits to Leads
Convert visitors of your website into leads and perform data enrichment based on their IP address

Lead Enrichment
Enrich your leads automatically with company data based on their email address

Lead Mining
Generate new leads based on their country, industry, size, etc.

2 - CRM workflow

- Acquire leads: by emails, website -> list of leads
- Convert leads into opportunity (manually | lead mining)
 - New
 - Qualified
 - Proposition
 - Won

3 - CRM Scenarios:

- Planning activity
- Generate leads/opportunities from emails/webpage
- Demo an opportunity lifecycle (+ send quotation, manage lost)

4 - CRM Config

- CRM Settings
- Sale team: leader, members, email. . .
- activity types
- pipeline: stages, tags, lost reasons (add, rm, edit),
- leads: change lead to opportunity, lead gen, lead mining, lead enrich, . . . (money)

IV - Sales

1 - Sales workflow

- Create a quotation
- Send it to your customer
- Wait for confirmation
- Confirm the sales order
- Create an invoice.

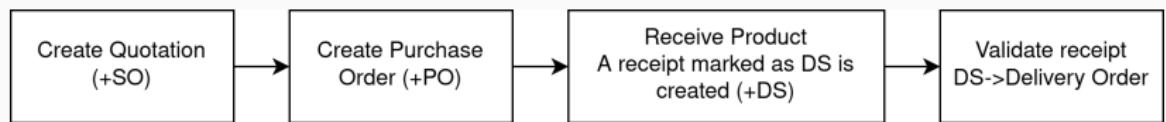

2 - Sales Scenarios

- Create and send quotations
 - use quotation template: product, optional products, signature, paid, deadline, deliver and invoicing address, term & condition
 - deliver lead time, price

3 - Dropshipping

- Enable dropshipping (purchase settings, product)
- PO is automatically generated when creating quotations
- When PO is confirmed and received, SO will update the delivery info

3 - Dropshipping

V. Odoo Studio

1 - Module

An Odoo Module can contain a number of elements, such as: business objects (models), object views, data files, web controllers, and static web data. An application is a collection of modules.

2 - Model

Model usually represents a concept from the real world. Example: Odoo has models for Sales Orders, Users, Countries, etc.

3 - Field

- scalar: number/text
- relational field: provide the option to link the data of one model with the data of another model.

New Fields		
Ab	Text char	Multiline Text text
N*	Integer integer	1.5 float
	Html html	€ monetary
	Date date	Date & Time datetime
<input checked="" type="checkbox"/>	Checkbox boolean	▼ Selection selection
	File binary	↔ One2many one2many
↔	Many2one many2one	↔ Many2many many2many
	Image binary	Tags many2many
★	Priority selection	✍ Signature binary
GD	Related Field related	

4 - View and Menu

- View: define how records are displayed
 - type view: form, list, kanban
- A Menu

VI. Planning

3 - Publish and Send Week Plan

- Automate by set up Scheduled Action

The screenshot shows a software interface for managing work shifts. At the top, there's a navigation bar with tabs for "Planning", "My Planning", "Schedule", "Reporting", and "Configuration". The "Planning" tab is active. Below the navigation is a toolbar with icons for "Today", "Day", "Week", and "Month". The main area is a calendar grid for the week starting on October 11, 2020. The days from Monday to Saturday are labeled. The time axis on the left ranges from 0:00 to 17:00. Two shifts are visible: a yellow shift from 4:00 PM to 12:00 AM on Tuesday, and a green shift from 8:00 AM to 2:00 PM on Wednesday. On the right side of the interface, there are several panels: a "My Shifts" search bar, a "Filters" section, a "Favorites" section, a "Calendar" view showing the month of October with specific dates highlighted, an "Employee" list with a checked entry for "Mitchell Admin", and a "Role" list with "Chef" and "Bartender" checked.

X. Accounting

1 - Overview

1 - Overview

- Create Journal Entry
- Create Journal Item
- Follow-up payments, follow up level
YourCompany

To remind customers of paying their invoices, you can define different actions depending on how severely overdue the customer is. These actions are bundled into follow-up levels that are triggered when the due date of an invoice has passed a certain number of days. If there are other overdue invoices for the same customer, the actions of the most overdue invoice will be executed.

Follow-Up Action	Due Days	Send an Email	Send a Letter	Manual Action	
First reminder email	15 <input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Second reminder letter and email	30 <input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Third reminder: phone the customer	40 <input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
Urging reminder email	50 <input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Urging reminder letter	60 <input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

\$ Payment Matching

Figure 5: Payment created manually

1 - Customer Invoice to Payments

- Payment that is created manually have to do Payment Matching (upper right button)

The screenshot shows a software interface for payment matching. At the top left, there is a search bar with the text "Noobfuku". To the right of the search bar is a "SKIP" button. Below the search bar, the text "Account Receivable" is displayed next to the account number "121000" and a "0" balance indicator. A horizontal line separates this from the main table area. The table has two tabs at the top: "Miscellaneous Matching" (which is selected) and "Manual Operations". Below the tabs is a search/filter bar with the placeholder "Filter on account, label, partner, amount..." and a magnifying glass icon. The main table lists two invoices:

Invoice Number	Date	Description	Amount	Status
BNK1/2020/10/0004	10/14/2020	Customer Payment \$ 100.00 - Noobfuku - 10/14/2020 : 2nd part of INV/2020/10/0002	\$ 100.00	0
INV/2020/10/0002	10/14/2020		\$ 100.00	0

Figure 6: Payment Matching

1 - Customer Invoice to Payments

The screenshot shows a reconciliation interface for a transaction between 'Noobfuku' and 'BNK1/2020/10/0004'. The payment details are as follows:

Account Receivable	Date	Description	Debit	Credit
121000	10/14/2020	BNK1/2020/10/0004: Customer Payment \$ 100.00 - Noobfuku - 10/14/2020 : 2nd part of INV/2020/10/0002		\$ 100.00
121000	10/14/2020	INV/2020/10/0002		\$ 100.00

A green 'RECONCILE' button is visible in the top right corner.

Figure 26: Taxes Configuration

11.1 - Taxes

- add/edit/activate/deactivate tax

The screenshot shows a configuration interface for a tax. At the top, there are four main input fields: 'Tax Name' (set to 'Tax 15.00%'), 'Tax Computation' (set to 'Percentage of Price'), 'Tax Type' (set to 'Sales'), and 'Active' (with a blue toggle switch). Below these are two tabs: 'Definition' (selected) and 'Advanced Options'. Under 'Definition', there are three groups of fields: 'Label on Invoices' (set to '15.00%'), 'Tax Group' (set to 'Tax 15%'), and 'Company' (set to 'Demo Company'). To the right of these are three checkboxes: 'Included in Price' (unchecked), 'Affect Base of Subsequent Taxes' (unchecked), and another checkbox which appears to be a separator or part of a dropdown menu.

Figure 27: Taxe Configuration

Tax Grid | Help generate Tax Report automatically |

11.1 - Taxes

Taxes and reports are usually already pre-configured: a Fiscal Localization Package is installed according to the country you select at the creation of your database.

11.1 - Taxes

- verify VAT number
- withholding tax (Retention tax group, negative value)

Tax Name	Tax 15.00%	Tax Scope	Purchases
Tax Computation	Percentage of Price Tax Included	Amount	15.0000 %
Active	<input checked="" type="checkbox"/>		
<input type="button" value="Definition"/> <input type="button" value="Advanced Options"/>			
Label on Invoices	15.00%	Included in Price	<input type="checkbox"/>
Tax Group	Tax 15%	Affect Base of	<input type="checkbox"/>
Company	Demo Company	Subsequent Taxes	<input type="checkbox"/>

11.2 - Fiscal Position

If a customer has a specific fiscal position, the default tax may be replaced by another

- specific tax on a specific product
- TaxCloud API
- tax and account mapping

Fiscal Position	European Companies	Detect Automatically	<input checked="" type="checkbox"/>
Use TaxCloud API	<input type="checkbox"/>	VAT required	<input checked="" type="checkbox"/>
Company	Demo Company	Country Group	Europe
		Country	
Tax Mapping		Account Mapping	
Tax on Product		Tax to Apply	
Tax 15.00% (Sales)		0 (Sales)	
Tax 15.00% (Purchases)		0 (Sales)	

11.2 - Fiscal Position

- automatically applied, based on some rules
- manually applied on a transaction
- assigned to a partner, on its contact form

11.3 - Tax Inlcude/Exclude

Handle the very specific use case where you need to handle the two prices (tax excluded and included) on the product form within the same company.

11.3 - Tax Include/Exclude

- choose only one and stick to it: price without taxes or price with taxes included
- define which default tax related to the product
- let Odoo compute the other one automatically, based on the pricelist and fiscal position
- negotiate your contracts with customers accordingly

11.3 - Tax Include/Exclude

1. always store the default price TAX EXCLUDED on the product form, and apply a tax (price included on the product form)
2. create a pricelist with prices in TAX INCLUDED, for specific customers
3. create a fiscal position that switches the tax excluded to a tax included
4. assign both the pricelist and the fiscal position to customers who want to benefit to this pricelist and fiscal position

11.3 - Tax Include/Exclude

- your product default sale price is 8.26€ tax excluded
- but we want to sell it at 10€, tax included, in our shops or eCommerce website

11.4 - Cash Basis Tax

The screenshot shows the configuration of a salary rule in the Odoo Payroll module. The rule is named "Basic Salary" and is categorized under "Basic". It has a code "BASIC" and uses the "Regular Pay" salary structure. The "Appears on Payslip" checkbox is checked. The sequence is set to 1 and it is active. There are tabs for General, Description, and Accounting, with General selected. Under Conditions, the condition is set to "Always True". In the Computation section, the amount type is "Python Code" and the code provided is "result = payslip.paid_amount". The Company Contribution section shows a dropdown for Partner.
